Campus Placement Report

Northbridge Institute of Technology, Academic Year 2025-26. Departments, faculty, courses, students, skills, companies, and offers.

This is fictional sample data written so an uploader can extract people, courses, skills, companies, and the links between them.

1. Departments

The Department of Computer Science is part of Northbridge Institute of Technology. It offers the courses Data Structures (CS101), Machine Learning (ML401), and Full Stack Development (CS310). The department focuses on software engineering, data, and applied artificial intelligence.

The Department of Electronics and Communication is part of Northbridge Institute of Technology. It offers the course Embedded Systems (EE210). The department focuses on hardware, firmware, and device programming.

The Training and Placement Cell is part of Northbridge Institute of Technology. The cell coordinates campus recruitment with Google, Microsoft, Razorpay, and Texas Instruments.

2. Faculty

Dr. Ananya Rao is a faculty member in the Department of Computer Science. She teaches Machine Learning (ML401). She leads the Campus Knowledge Graph project. Her research skill is machine learning.

Prof. Vikram Shah is a faculty member in the Department of Computer Science. He teaches Data Structures (CS101). He advises the Placement Portal project. His teaching skill is algorithms.

Dr. Meera Iyer is a faculty member in the Department of Electronics and Communication. She teaches Embedded Systems (EE210). She mentors firmware internships. Her teaching skill is embedded C.

3. Courses and skills

Data Structures (CS101) is a course in the Department of Computer Science. Prof. Vikram Shah teaches Data Structures. The course requires the skills algorithms and Python. Students who complete it can apply for software engineer roles.

Machine Learning (ML401) is a course in the Department of Computer Science. Dr. Ananya Rao teaches Machine Learning. The course requires the skills Python and machine learning. It is part of the Campus Knowledge Graph project.

Full Stack Development (CS310) is a course in the Department of Computer Science. The course requires the skills JavaScript and React. It is part of the Placement Portal project.

Embedded Systems (EE210) is a course in the Department of Electronics and Communication. Dr. Meera Iyer teaches Embedded Systems. The course requires the skill embedded C.

4. Students

Hassan Ali

Hassan Ali is a student in the Department of Computer Science. Hassan Ali is enrolled in Data Structures (CS101) and Machine Learning (ML401). Hassan Ali has the skills Python, machine learning, and algorithms. Hassan Ali works on the Campus Knowledge Graph project. Hassan Ali received a placement at Google as a Machine Learning Engineer.

Priya Nair

Priya Nair is a student in the Department of Computer Science. Priya Nair is enrolled in Data Structures (CS101) and Full Stack Development (CS310). Priya Nair has the skills JavaScript, React, and Python. Priya Nair works on the Placement Portal project. Priya Nair received a placement at Microsoft as a Software Engineer.

Arjun Mehta

Arjun Mehta is a student in the Department of Electronics and Communication. Arjun Mehta is enrolled in Embedded Systems (EE210). Arjun Mehta has the skill embedded C. Arjun Mehta received a placement at Texas Instruments as a Firmware Engineer.

Sana Qureshi

Sana Qureshi is a student in the Department of Computer Science. Sana Qureshi is enrolled in Machine Learning (ML401) and Full Stack Development (CS310). Sana Qureshi has the skills Python, machine learning, and React. Sana Qureshi works on the Campus Knowledge Graph project. Sana Qureshi received a placement at Razorpay as a Backend Engineer.

5. Companies, jobs, and placements

Google is a company recruiting through the Training and Placement Cell. The job Machine Learning Engineer at Google requires the skills Python and machine learning. The placement of Hassan Ali is a Machine Learning Engineer role at Google. The offer is part of the 2025-26 campus drive.

Microsoft is a company recruiting through the Training and Placement Cell. The job Software Engineer at Microsoft requires the skills algorithms, Python, and data structures. The placement of Priya Nair is a Software Engineer role at Microsoft.

Razorpay is a company recruiting through the Training and Placement Cell. The job Backend Engineer at Razorpay requires the skills Python and JavaScript. The placement of Sana Qureshi is a Backend Engineer role at Razorpay.

Texas Instruments is a company recruiting through the Training and Placement Cell. The job Firmware Engineer at Texas Instruments requires the skill embedded C. The placement of Arjun Mehta is a Firmware Engineer role at Texas Instruments.

6. Projects

Campus Knowledge Graph is a project in the Department of Computer Science. Dr. Ananya Rao leads the project. Hassan Ali and Sana Qureshi work on the project. The project requires the skills Python and machine learning. The project is part of the course Machine Learning (ML401).

Placement Portal is a project in the Department of Computer Science, built for the Training and Placement Cell. Prof. Vikram Shah advises the project. Priya Nair works on the project. The project requires the skills JavaScript and React. The project is part of the course Full Stack Development (CS310).
